

Why TORCH SD?

Preventing ice can be tough.

When extreme weather hits, our effective and proven lines of products are here to help. They fight ice on contact, stop ice from bonding to surfaces, and prevent water from freezing. Each storm provides unique challenges that need unique solutions. Whether you need bulk sodium or a designer ice melt, we have a solution for you. Our liquid and granular deicing products are derived and colored naturally, because we know that nature provides us with the best ingredients available.

Water insolubles	0.020 - 1.500%
Moisture	<1.0%

Bulk Density 71 lbs/ft³

99%

Active Chloride Levels

 **Thicker bag and Kiln Drying creates longer shelf life compared to other ice melts**

 **Pet friendly**

 **Naturally blended sodium with Calcium, Potassium, and Magnesium**

 **Less corrosive than traditional ice melts**

 **Less harmful to vegetation**

Keep your family, pets, and neighbors safe with TORCH SD.

For homeowners, landscapers, snow removal specialists and more who need quick access to high-quality deicing salt at a very competitive price. TorchSD is a pet-friendly bagged deicing salt that quickly creates a brine and melts ice for a longer period of time. Unlike other overpriced and ineffective bagged salts, TORCH SD provides a quick burn that brings surfaces back to a safe condition faster. TORCH SD is kiln dried, enabling easy flow during application, and a higher concentration of chlorides extends performance, which allows longer times between re-application.

Effective down to: -5°
